

# DTS 3300 (formerly the DTS 2302)

The DTS 3300, a larger version of the DTS 1300, is also primarily intended for tracing forms into grinding wheels. When used in tracing applications, this model may accommodate diamond rolls up to 6 inches (150 mm) in diameter and ½ inch (13 mm) wide. Because the DTS 3303 features a larger shaft and bearings than the DTS 1300, it is sometimes used to plunge forms into grinding wheels, usually up to about 1½ inches (40 mm) wide.
